

TECHNICAL ARCHITECT ref: CNS/TA/310112

Capital Network Solutions Limited are the sole Cisco Premier Partner based in South Wales and are a leading Systems Integrator who specialise in Networking, Unified Communications, Security, Wireless and Managed & Professional Services.

They hold strategic partnerships with leading technology vendors including Cisco, Barracuda, CRYPTOCard and Dell.

Due to continued growth they are now looking to recruit a Technical Architect for their Professional Services and Unified Communications team.

Reporting to the Technical Director, the Technical Architect will be responsible for designing, deploying and supporting technical solutions for new and existing customers, and providing 2nd line and 3rd line support to the internal service desk. The role will involve a varied mix of unified communications, networking, server, storage, virtualisation and other projects to multi sector based organisations. The role incorporates both remote support and onsite customer visits.

A high level of understanding of network technologies and an excellent knowledge of SAN, MS Windows Server, MS Exchange, virtualisation and relating technologies is required. A recent working knowledge of Cisco IPT solutions such as Unified Communications Manager Express and UC500 is essential.

Essential:

- Microsoft Windows Server (all versions from 2003 - 2011)
- Microsoft Exchange Server
- Virtualisation technologies (ESXi and Hyper-V)
- SAN (HP, Dell PowerVault and EqualLogic)
- Knowledge of networking technologies (switching, routing, firewalls, security, VPN)
- Knowledge of Cisco IOS
- Experience in supporting, troubleshooting and configuring Cisco IP telephony systems and Voice Gateways

Desirable:

- Microsoft SQL Server (all versions 2005+)
- Blackberry Enterprise Server
- Sharepoint
- Knowledge of Cisco routing, switching, security and wireless
- Knowledge of Cisco Unity, Cisco Unity Express and Contact Centre Express
- Experience of features such as Extension Mobility, Music On Hold, pick-up and hunt groups
- Knowledge of SNMP

Certifications in any of the above technologies would be very desirable, particularly CCNA, CCNP or CCVP, MCIPT and VMWare Certified Professional.

The successful applicant must have the ability to thrive within a fast paced, demanding environment whilst maintaining high standards and a customer centric approach.

This is an excellent career opportunity for a highly motivated technical professional that wishes to work as part of a highly accredited team.

A structured professional development plan will be implemented overseen by our CCIE providing excellent progression opportunities for those wishing to develop their career further.
